Subject: Dimock - Sampling Rationale - DRAFT

Rich,

A while back you had requested us to work on a document detailing the rationale of why each sample was being run for each particular analysis. I have attached a draft document listing all the parameters being analyzed for and I tried to capture a rationale on why it was being performed. I also added some info regarding whether that parameter had enforceable screening levels (i.e. MCL) or State levels. If you are looking for something more generic such as "because it is listed on the Congressional Report" please let me know.

Please let me know if you have any questions.

Thanks,

Suddha Graves
